WHAT OUR CUSTOMERS ARE SAYING...

"We have been big supporters of Port Tampa Bay's efforts to attract new services because of our significant DC capacity right next door in Lakeland. The Port's proximity makes it easy for truckers who can make multiple round trip deliveries per day."

ALI HOSEIN

VP International Freight & Merchandising, Rooms to Go

"We ship our product to all 50 states and over 100 countries across the globe. These new services will definitely enhance our ability to serve China and the rest of Asia which is an important and growing export market for Amalie Oil,"

RICK BARKETT

COO, Amalie Oil

"As a rapidly expanding Tampa based company with an extensive Asian supply chain, these new direct services are very welcome news and will greatly facilitate our continued growth and expansion."

BEN MENG

President, iGas USA, Inc.

"This will mean faster deliveries to our distribution centers and ultimately to our stores and customers. We already have a great relationship with Port Tampa Bay where they arrange for our drivers to be badged, allowing us to pick up our containers at the port using our own trucks, delivering them to our DC in Mulberry. The same driver can then make a delivery to the store."

RICK MEYER

VP of Supply Chain, W.S. Badcock Furniture
